I'm a React Web application developer with experience in building responsive and optimized web application using the latest technologies and practices in a remote environment for a year and a half. I've worked on different kind of projects such as SPA's, landing pages, e-commerce while keeping the design as per provided by the UI/UX team.

Experience

OCTOBER (2022) – OCTOBER (2023)

Front-End Web Developer Intern (Remote) / Poiesis Technologies, Bahria Town, Islamabad, Pakistan

- Review, discuss and plan the required framework and libraries with the product manager for website development.
- Use of Figma and the website design provided in it by the UI/UX team.
- Use of HTML5, Custom CSS, React, React-Bootstrap, and Tailwind CSS for the development.
- Making use of the reusable code as much as possible.

MAY (2024) – AUGUST (2024)

MERN Stack Developer Intern (Remote) / BlueSquare Technologies, Islamabad, Pakistan

- Develop Responsive and Optimized React Web Applications using the best market practices and personal knowledge.
- Use of Figma, Vite+Reactjs, Tailwind CSS, Nodejs, Express, MongoDB, Custom Hooks for the development.
